Is your ERP giving you what you want?
- Are you running your business on spreadsheets?
- Do you have to wait hours or days to get the information you need?
- Are you wasting time and money developing the functions your ERP does not have?

"What companies need instead are flexible systems that allow them to respond rapidly to customer needs and new opportunities in an increasingly competitive environment."

Rethinking Your ERP Strategy to Gain Digital Competitive Advantage
Florian Braun, Berry Diepeveen and Henrik Östhed
Bain & Company, 2019

"EOS is the alternative to ERP and pre-condition for Enterprise 4.0"

Youssef, Zacharewicz & Chen
Bordeaux University, IEEE 2016, Paris

For over 30 years, ERP has been the software of choice for companies worldwide because there was no alternative. Many ERP implementations create major operational disruptions at go-live, add unnecessary complexities and uncertainties, and become what we call Excel-ence organisations; you run your business on Excel spreadsheets to overcome ERP deficiencies.

LOVIS EOS is the ultimate transformation of ERP.

EOS Created for Humans

Innovative companies like yours are looking for the **certainty and simplicity** in the operation, information and evolution needed **to succeed and thrive**.

You need **zero-code Enterprise Software** to run **fully configurable** integrated beginning-to-end business processes and obtain **real-time information that reflects your organisation's reality**. Hence, you will make the best decisions, recover time, **grow your profits and fulfil your mission**.

Certainty and simplicity in

Implementation
Zero-code fully customised implementations in less than six months, with no operational disruption at go-live.

Operation
Fully configurable beginning-to-end business processes fulfil your needs from day one, transactional double-entry with fully automated 3-D accounting records, and no daily, monthly or annual closing procedures provide you with the agility you want.

Information
Reliable information that reflects your organisation's reality is created and available in real-time; distributed and consolidated IFRS, EUGAAP and USGAAP compliant financial statements by business centre, project, customer and business line are updated every morning.

LOVIS eos

All you need

We listen to our client's problems and needs and incorporate solutions that benefit everyone. LOVIS EOS fully supports the specific needs of over 25 sectors. It complies with the tax and accounting requirements of 11 countries and the specifics of many languages.

Forever

Focus on your business. With hundreds of variations to more than seventy beginning-to-end business processes readily available, LOVIS EOS supports your needs today and tomorrow. You will always be on top of your business, ready to grow, adaptive to new requirements and with seamless updates.
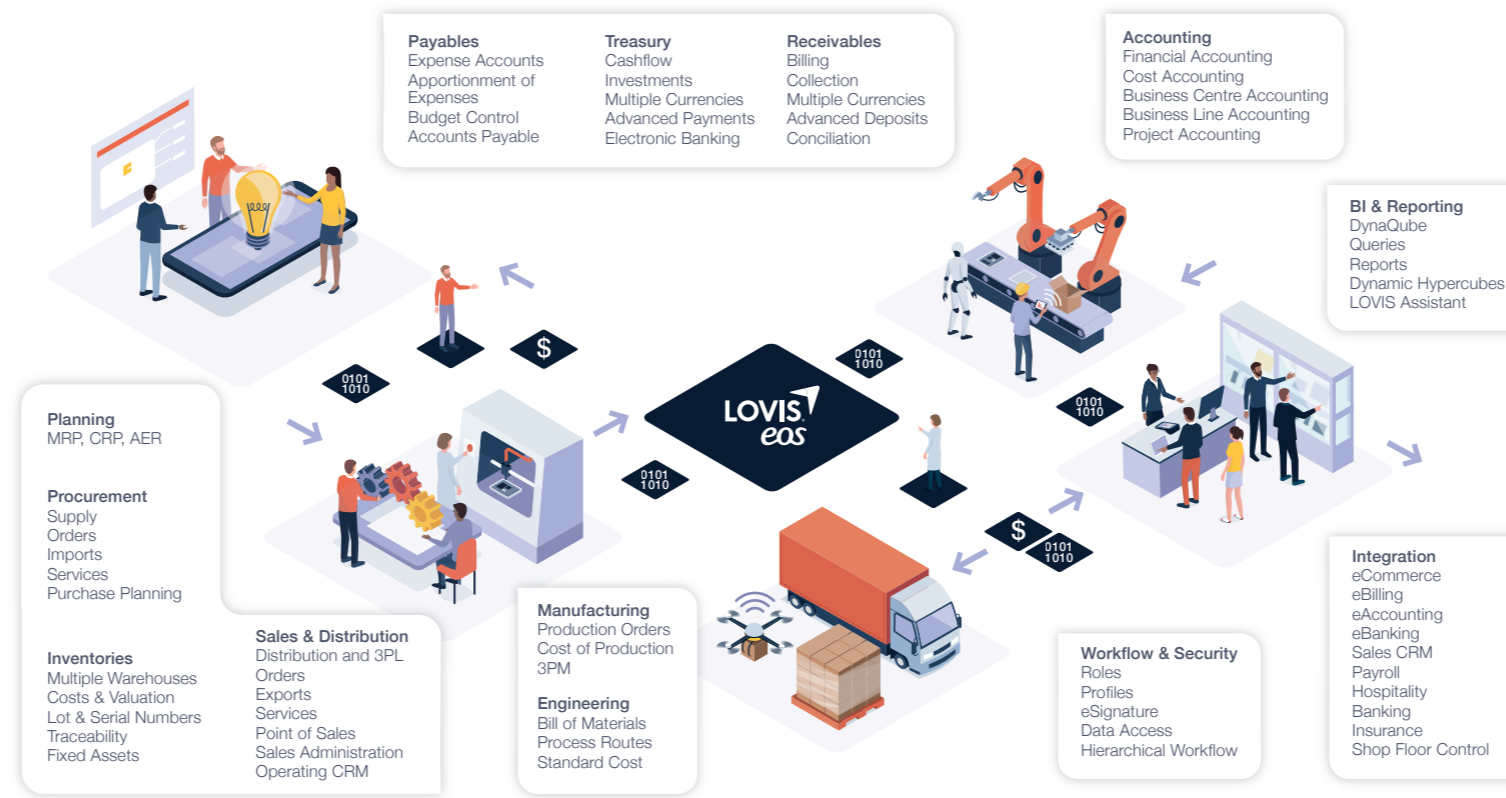

Easy

Simplify how you run your business. LOVIS EOS end-user interface reduces time and effort for training and use. Record auto-fill and click-to-advance allow performing your business processes fast and easily. Every user will get their job done productively with your set of Next Practices.

Flowing

Improve communication and collaboration. Build your workflow profiles in minutes by combining functional, facility, geographical, entity-type and item-type roles via drag-and-drop. Function and data security is updated automatically to comply with risk matrices and clearance. Integrate clients, vendors, and manufacturing and logistics third parties to your LOVIS EOS.

All around

Expand your reach. Connect LOVIS EOS to eCommerce, CRM, IoT, Machine Learning, AI, BI and many other platforms in real time via our APIs. We are constantly adding new ones for you. Easily export and import data to and from legacy applications.

In the air

Work the way you want. A native of the cloud, LOVIS EOS is accessible from any device, anywhere, anytime, with bank-grade security. Users bring their own device; we take care of everything else with 99.9%+ full annual transactional availability and < 1/7 carbon footprint.

The answer

Make the best decisions. LOVIS EOS includes hundreds of queries, reports and Business Intelligence (BI) tools, which end-users run, customise and create via DynaQube, our dynamic hypercube generator. When you ask LOVIS Assistant answers, you will leave your competitors speechless.

Fair

Be safe. Clear and transparent simultaneous session subscription includes unlimited named users and what you need to run your organisation; no surprises.

Industry Solutions

LOVIS EOS includes specific solutions for more than 25 industry sectors, including:

- Food and Beverages
- Chemicals, Pharmaceuticals, Paper, Plastics
- Automotive, Aerospace
- Mining, Lumber, Agri-business
- Hospitality and Healthcare
- Retail and eCommerce
- Finance, Utilities, Government

Business Solutions

LOVIS EOS supports hundreds of variations of over seventy integrated kanban-type beginning-to-end business processes in twelve groups:

- Sales Order to Cash
- Purchase Order to Payment
- Inventory and WMS
- Fixed and Deferred Assets
- Manufacturing and Maintenance
- Engineering
- Demand Planning
- Billing to Cash
- Expenses to Payment
- Treasury
- Accounting
- Business Intelligence

System Administration

- Business Process Management and Workflow
- Configuration, High-Availability and Security

Give us the problems your ERP cannot solve, and, in a few weeks, we will show you how LOVIS EOS solves them.

The plan

Diagnostic
One of our Business Partners will identify your problems and needs, measure their implications and establish how LOVIS EOS solves them.

Value Proposition
They will present a "Walk on the Clouds" bespoke demonstration, size the project, and prepare a deployment plan and the business case, including investment and returns.

Implementation
Our Business Partner will work with your team to set your business processes, configure LOVIS EOS, train your end-users, and upload master and operational data. After go-live, you will have full support to eliminate your problems and their implications, satisfy your needs and achieve the benefits.

Certainty and Simplicity to Succeed and Thrive

"LOVIS EOS is an easy-to-adopt, flexible and trustful platform; business visibility increased, and mistakes enormously decreased.

We detected and eliminated a million dollars in supply-chain annual recurring losses thanks to LOVIS EOS."

Rodrigo Maza
Head of e-Commerce & Omnichannel
ABInBev Middle Americas

EOS
✓ Fully customised zero-code Enterprise Software
✓ Integrated beginning-to-end Business Processes
✓ Less than six months implementation
✓ No disruption at go-live
✓ Non-stop closing procedures
✓ Real-time information that reflects your reality
✓ Simultaneous sessions subscription with unlimited named users, updates included, no surprises.
✓ Multitenant Cloud 99.9%+ transactional availability
✓ Seamless updates to new versions

ERP
✗ Time, money and effort for code development
✗ Modular: interfaces and conciliations dependent
✗ Two to five or more years to implement
✗ Major operational disruptions at go-live
✗ Monthly disruptions to run closing procedures
✗ Delayed, inaccurate and unreliable information
✗ Complex and expensive module and named-user licensing model
✗ Painful and costly migration to the cloud
✗ Complex reimplementation to adopt new versions
